[REDACTED] EXAMINER

STASHICK, ANTHONY D

[REDACTED] ART UNIT [REDACTED] PAPER NUMBER

3728

DATE MAILED: 06/25/2003

19

Please find below and/or attached an Office communication concerning this application or proceeding.

fw

Office Action Summary	Application No.	Applicant(s)	
	09/584,375	Garvie	
	Examiner Anthony D. Stashick	Art Unit 3728	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 08 April 2003.
- 2a) This action is FINAL. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 1-5 and 12-20 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) Claim(s) _____ is/are allowed.
- 6) Claim(s) 1-5 and 12-20 is/are rejected.
- 7) Claim(s) _____ is/are objected to.
- 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on 31 May 2000 is/are: a) accepted or b) objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) The proposed drawing correction filed on _____ is: a) approved b) disapproved by the Examiner.
If approved, corrected drawings are required in reply to this Office action.
- 12) The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) All b) Some * c) None of:
1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) The translation of the foreign language provisional application has been received.
- 15) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Art Unit: 3728

DETAILED ACTION

1. In view of the Appellant's Brief filed on April 8, 2003,
PROSECUTION IS HEREBY REOPENED. The claims are rejected as set
forth below.

To avoid abandonment of the application, appellant must
exercise one of the following two options:

- (a) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,
- (b) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b) (2).

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Art Unit: 3728

2. Claims 1-5 and 12-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over the EP reference to Aotani EP 342,232 (EP '232) in view of Brady 2,222,650 and MacNeill 5,996,260. EP '232 discloses all the limitations substantially as claimed including the following: an insert (41a, 51a, 61a); a traction member (41b, 51b, 61b); the insert and traction member are distinct elements (see Figures 4b, 5b, 6b); the insert formed of a synthetic plastic material (see col. 5, lines 15-46 and col. 3, line 58-col. 4, line 15); the insert having a stem portion with releasable engagement means (see Figures 4b, 5b, 6b stem is threaded); the traction member secured to the insert and encasing the insert (see Figures 4b, 5b, 6b); the insert made entirely of synthetic plastic material (see col. 5, lines 15-46 and col. 3, line 58-col. 4, line 15); the stem portion having a first end (with threads) and a second end (with flange); the first end of the stem portion having engagement means (threads); the second end having a securing formation (flange); the insert having a spike opposite the first end 61e; traction member has a pair of passages arranged to receive a fastening tool (41d, 61d); the flange is extending radially from the stem (see Figures); the flange has a plurality of apertures through it (those for fastening the cleat to the shoe). EP '232 does not teach or disclose the traction member being made of plastic, the

Art Unit: 3728

insert having a raised spike opposite the first end of the stem portion and aligned with the traction member and the plastic members having different hardnesses or colors. Brady '650 teaches that an insert with a traction member attached can have a raised spike 31 located on the insert and aligned with the traction member (point of 32) to aid in penetrating the ground. Brady '650 also teaches that the insert can be encased, except for the threaded portion, by rubber (as shown in Figure 15) to aid in the penetration of the ground by the traction member. MacNeill '260 teaches that outer traction member portion encasing an insert can be made of natural rubber, thermoplastic rubber, soft polyvinyl chloride, soft polyurethane, or soft plastic thereby aiding in gaining traction. This teaches that plastic can be used in place of rubber as the outer traction member of a spike to aid in gaining traction with the ground. MacNeill '260 also teaches that the different plastics used in a spike insert and traction member can made of different colors (col. 3, line 58-col. 4, line 11) to aid in determining the wear and tear on the cleat. Furthermore, MacNeill '260 teaches that the material of the traction member and the base can be made of different hardnesses, the material of the traction member being softer (i.e. less hard) than the material of the base (see col. 3, lines 11-42), the softer outer layer aiding in improving

Art Unit: 3728

traction and the stiffness and hardness of the base layer aiding in giving support to the projections. Therefore, it would have been obvious, in view of Brady '650, to make the insert of a traction member with a spike that is aligned with the traction member, as shown in Brady '650, as well as encase the entire insert, except for the threaded portion, in rubber to aid in penetrating the ground and gaining traction. Furthermore, it would have been obvious, to one of ordinary skill in the art at the time the invention was made, to make the traction member and insert member of EP '232 out of plastics, as taught by MacNeill '260, which can be of different hardnesses and colors, as taught by MacNeill '260, to aid giving support to the projection and help in dispersing impacts and to aid in visually determining the wear and tear on the cleat. With respect to claim 3 and the hardness of the materials, it appears that it would have been a mere matter of testing and optimization to find the hardness of the material of the insert that would allow for proper mounting of the cleat and preventing shearing of the stem.

Response to Arguments

2. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection. It is believed the rejections above address

Art Unit: 3728

applicant's concerns with respect to the traction member being made of plastic, taught by MacNeill to be interchangeable with rubber or used in place of rubber, and the insert having a raised spike that is aligned with the traction member, as taught by Brady in Figure 15. Also, the encasing of the insert except for the threaded portion is addressed with the teaching of Brady.

Conclusion

Telephone inquiries regarding the status of applications or other general questions, by persons entitled to the information, "should be directed to the group clerical personnel and not to the examiners. In as much as the official records and applications are located in the clerical section of the examining groups, the clerical personnel can readily provide status information without contacting the examiners", M.P.E.P. 203.08. The Group clerical receptionist number is (703) 308-1148.

If in receiving this Office Action it is apparent to applicant that certain documents are missing, e.g., copies of references cited, form PTO-1449, form PTO-892, etc., requests for copies of such papers or other general questions should be directed to Tech Center 3700 Customer Service at (703) 306-5648, email CustomerService3700@uspto.gov.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anthony D. Stashick whose telephone number is 703-308-3876. The examiner can normally be reached on Monday-Thursday, 6:00 am until 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mickey Yu can be reached on 703-308-2672. The fax phone numbers for the organization where this

Art Unit: 3728

application or proceeding is assigned are 703-872-9302 for regular communications and 703-872-9303 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1148.

Other helpful telephone numbers are listed for applicant's benefit.
